I'm an accelerant!

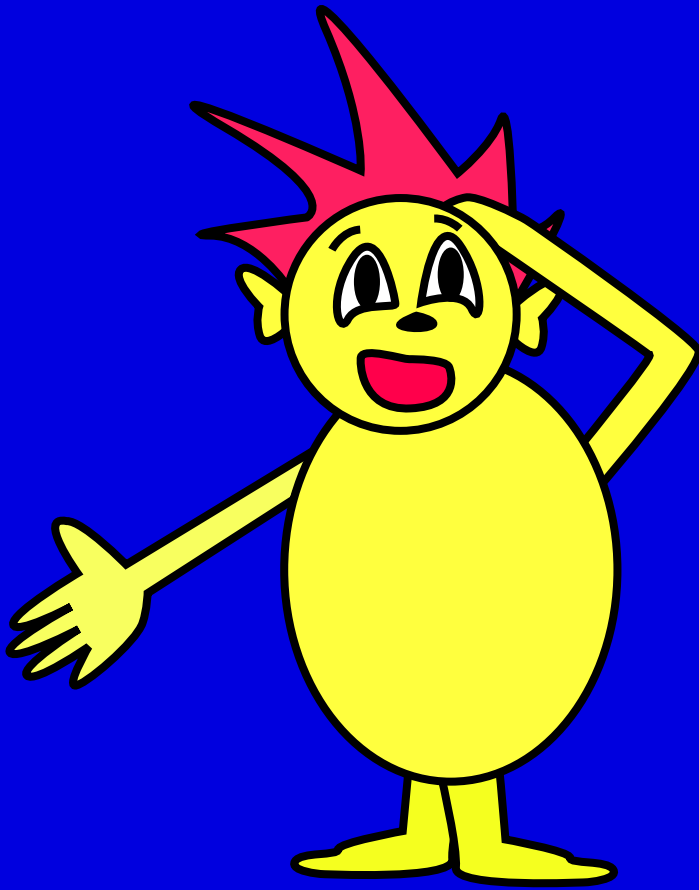

I need to quickly identify bits of missed content and catch up on these before I start at my new level.

© Karen Hughes 2006

I'm fast and I know my stuff.

I need further challenge and enrichment in EVERY lesson

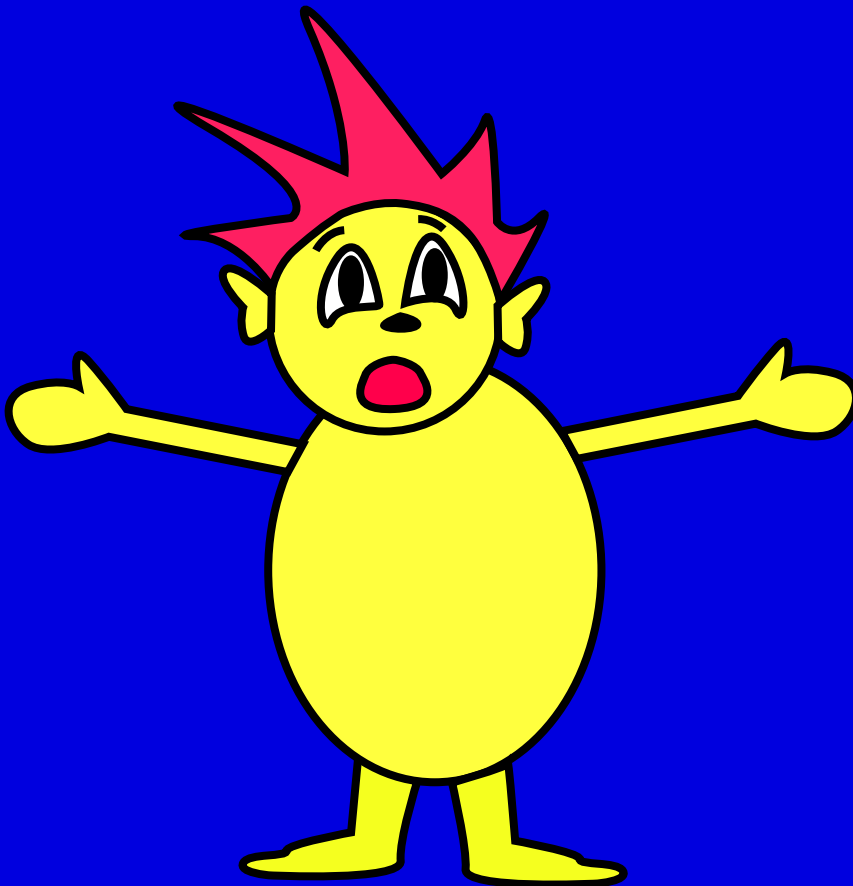

© Karen Hughes 2006

I'm O.K. at Maths.

Sometimes I forget what I've learned.

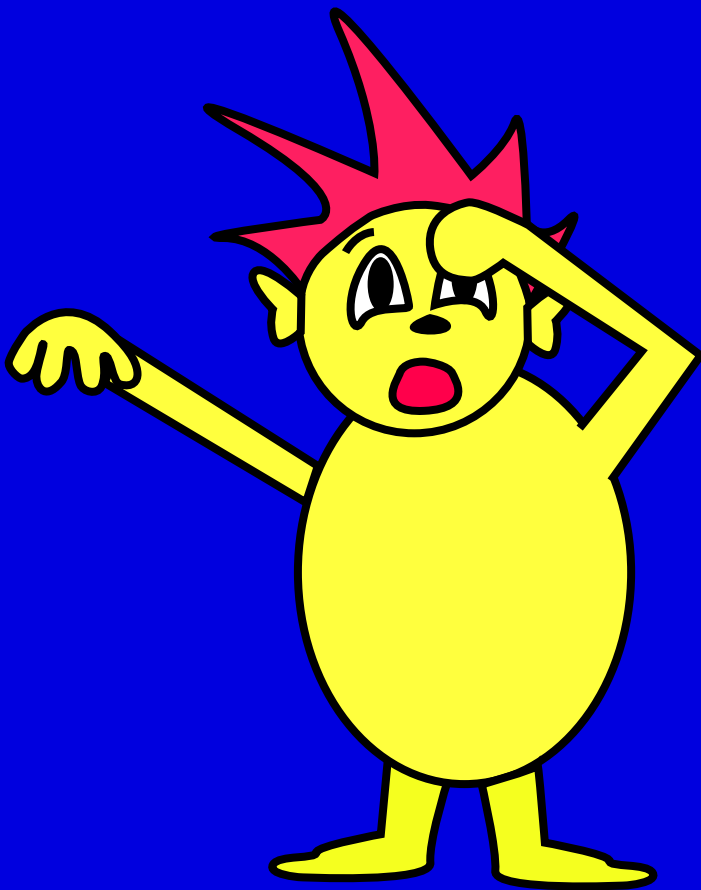

I need a structured system of recall.

© Karen Hughes 2006

I take my time to learn.

I need lessons that I can finish in my own good time at home.

© Karen Hughes 2006

I need serious help!

I need lessons that are clear to Mum and my tutor.

© Karen Hughes 2006

Everything is so confusing. I mix up the timetable, go to the wrong classroom, forget my books and homework diary and miss what the teacher is saying when I copy down notes.

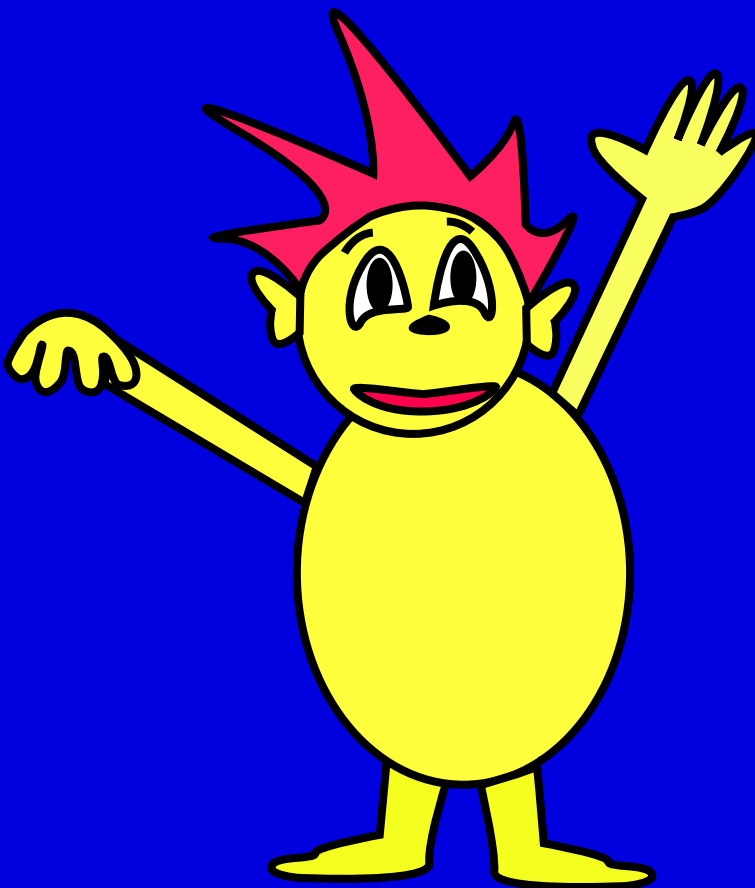

I need the teacher to be organised for me while I adjust to highschool. It makes such a difference if they bring my lessons to class with them.

© Karen Hughes 2006

I get angry and discouraged when tests don't test what I've spent ages practising!

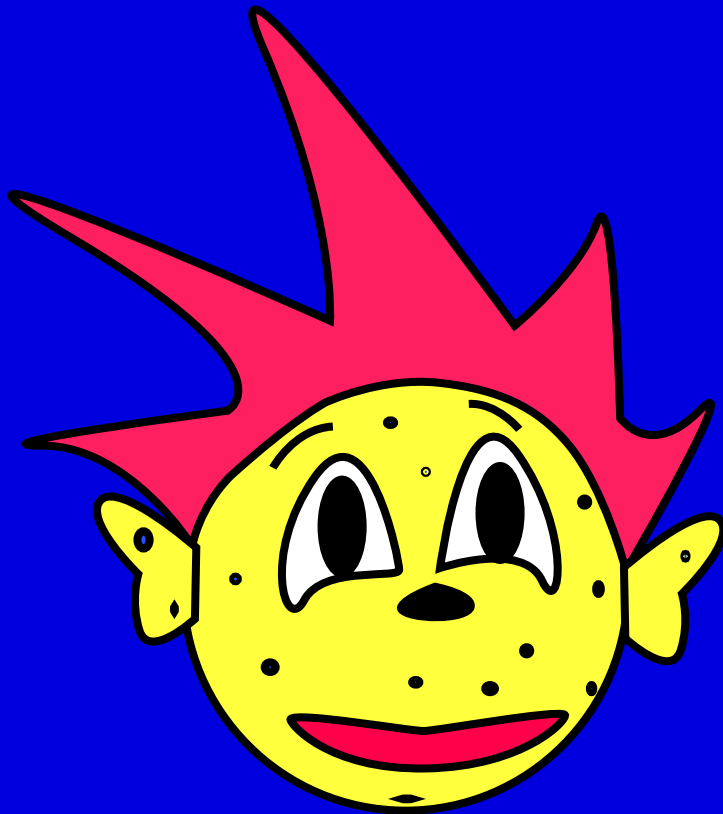

I need tests which reward my efforts or I won't bother studying any more!

© Karen Hughes 2006

Mum and Dad split up last year and school was a blur. But I'm ready to catch up now.

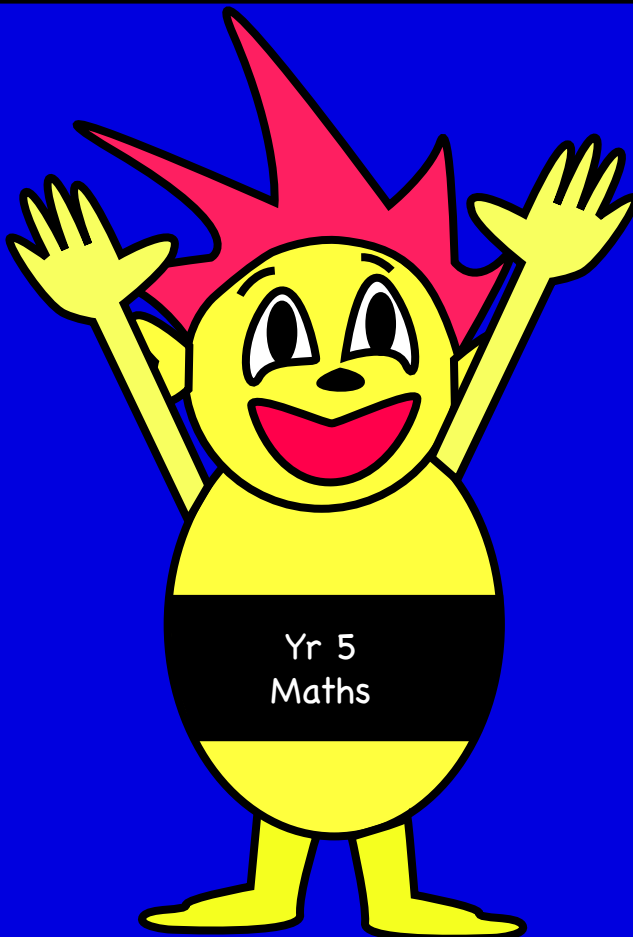

I need lessons that teach me what I missed.

© Karen Hughes 2006

I'm infectious but I could keep up with my work at home.

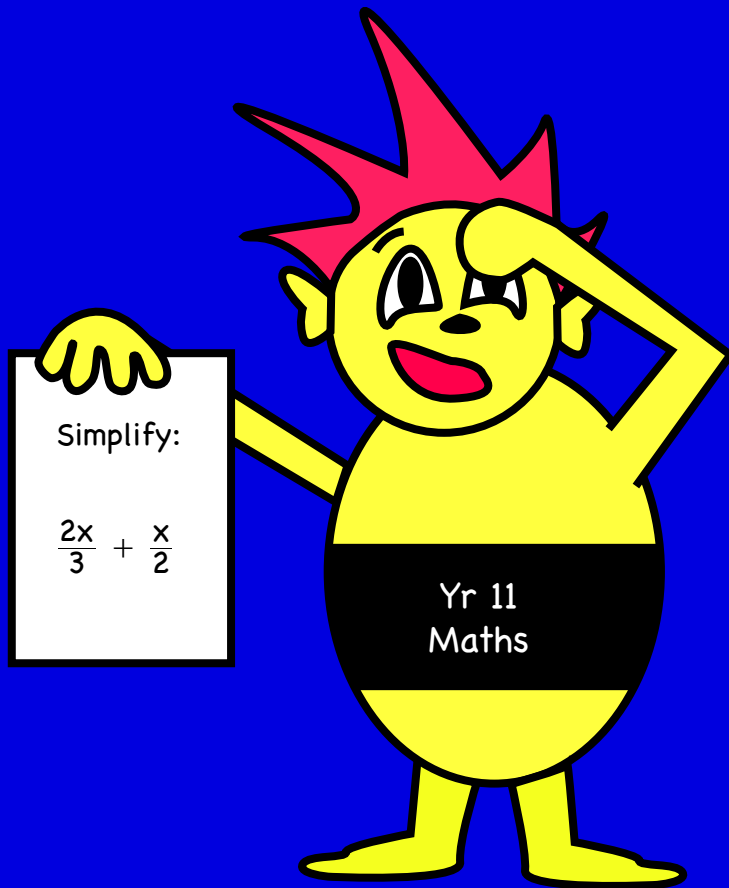

I need self-teaching lessons. I could get them over the internet and print them out, to save Mum the trouble of picking them up from school.

© Karen Hughes 2006

I'm in Year 5 and love learning maths.

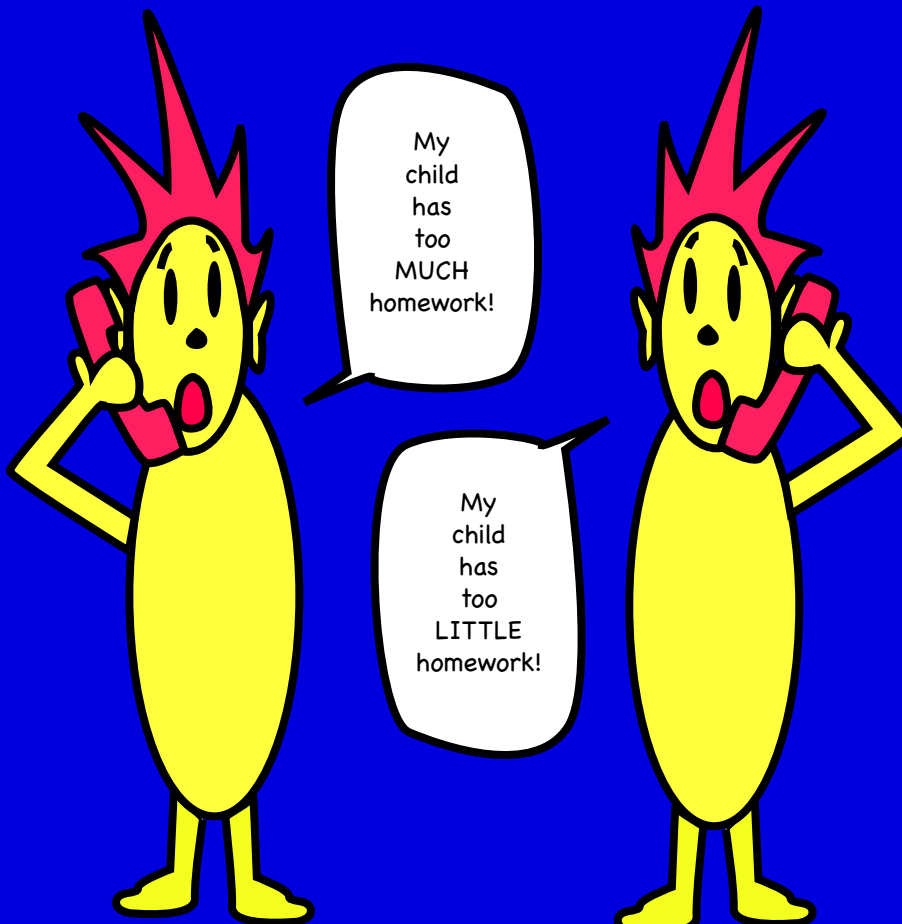

I could learn so much more if my teacher and I had an easy to follow system of independent learning.

© Karen Hughes 2006

I'm doing Year 11 Maths but I still don't get fractions!

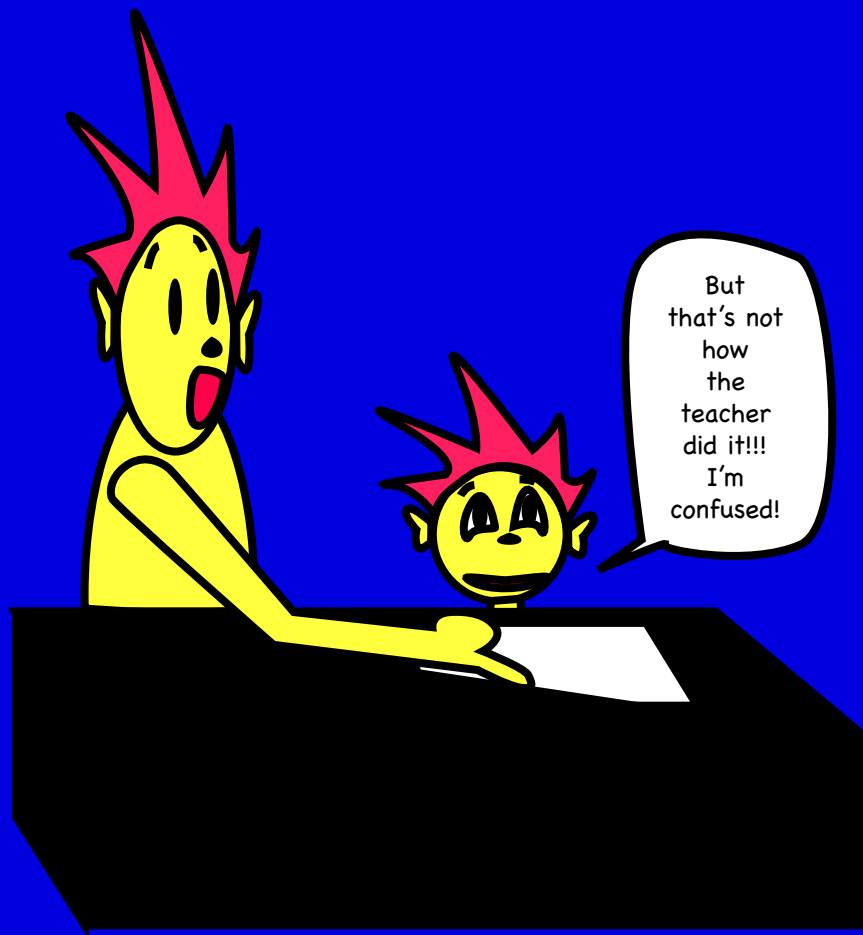

I need some quick Year 7 lessons that I can do at home.

© Karen Hughes 2006

We want regular and predictable amounts of homework that don't freak out our children.

We want to know that it is regularly checked.

© Karen Hughes 2006

My child needs my help at home.

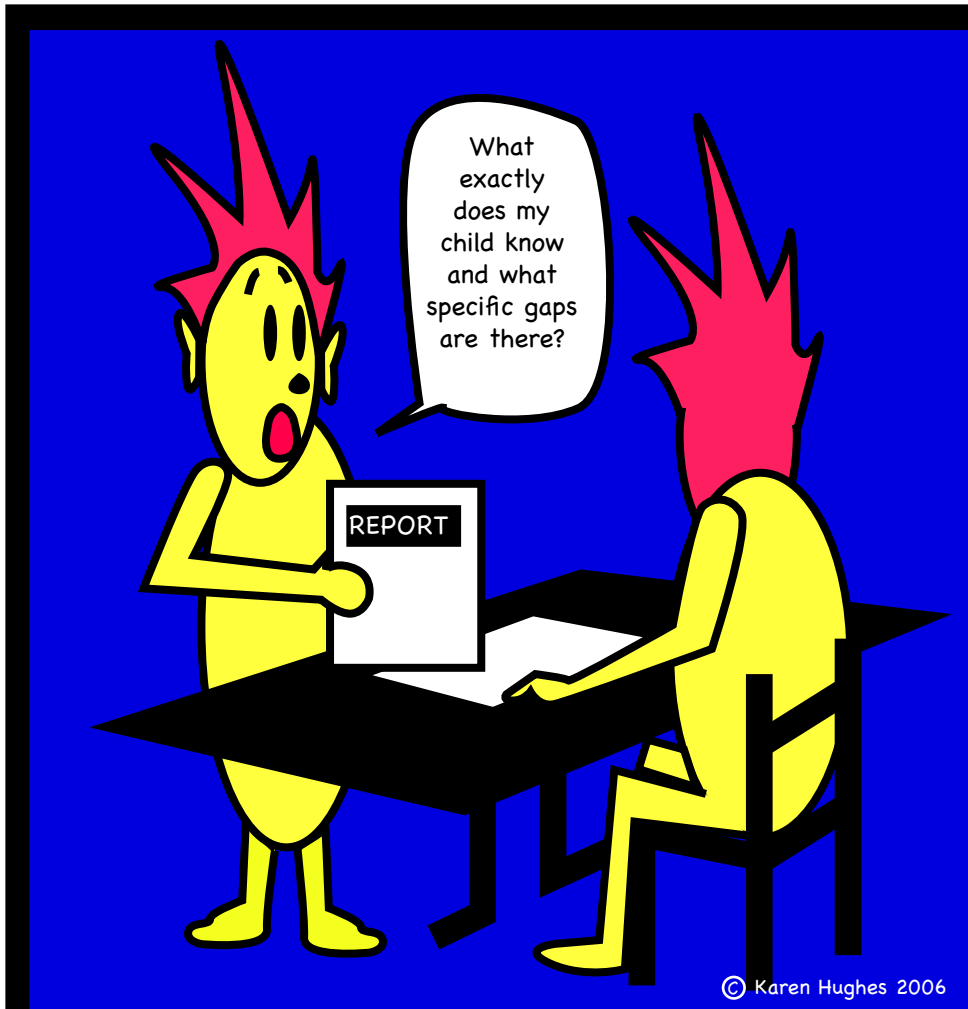

I need lessons that I can follow, with fully worked solutions and clear methods consistent with what is learned at school.

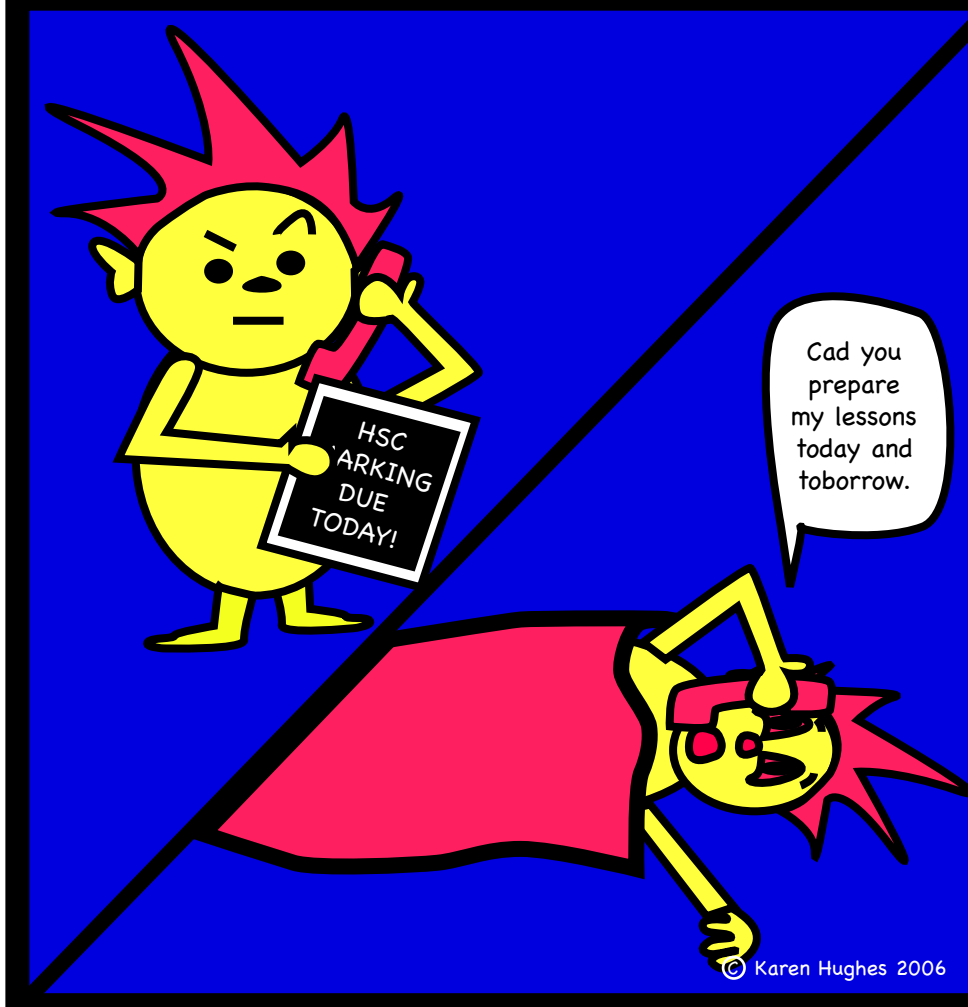

© Karen Hughes 2006

It feels like all I do is fill in forms and troubleshoot!

I need a structured system that not only clearly identifies missed content but provides lessons to close the gap.

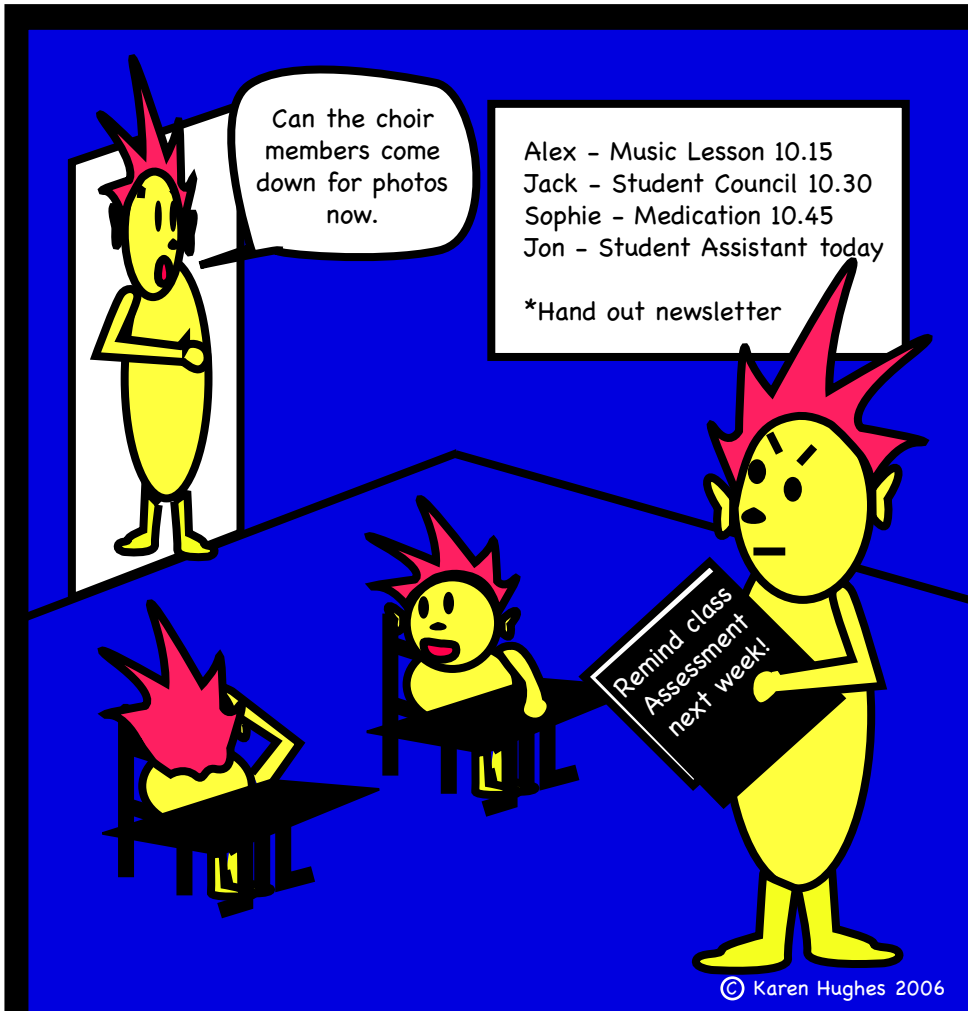

As a parent, I need an easily maintained ongoing progress report of my child's learning, giving specific information that I can interpret and address.

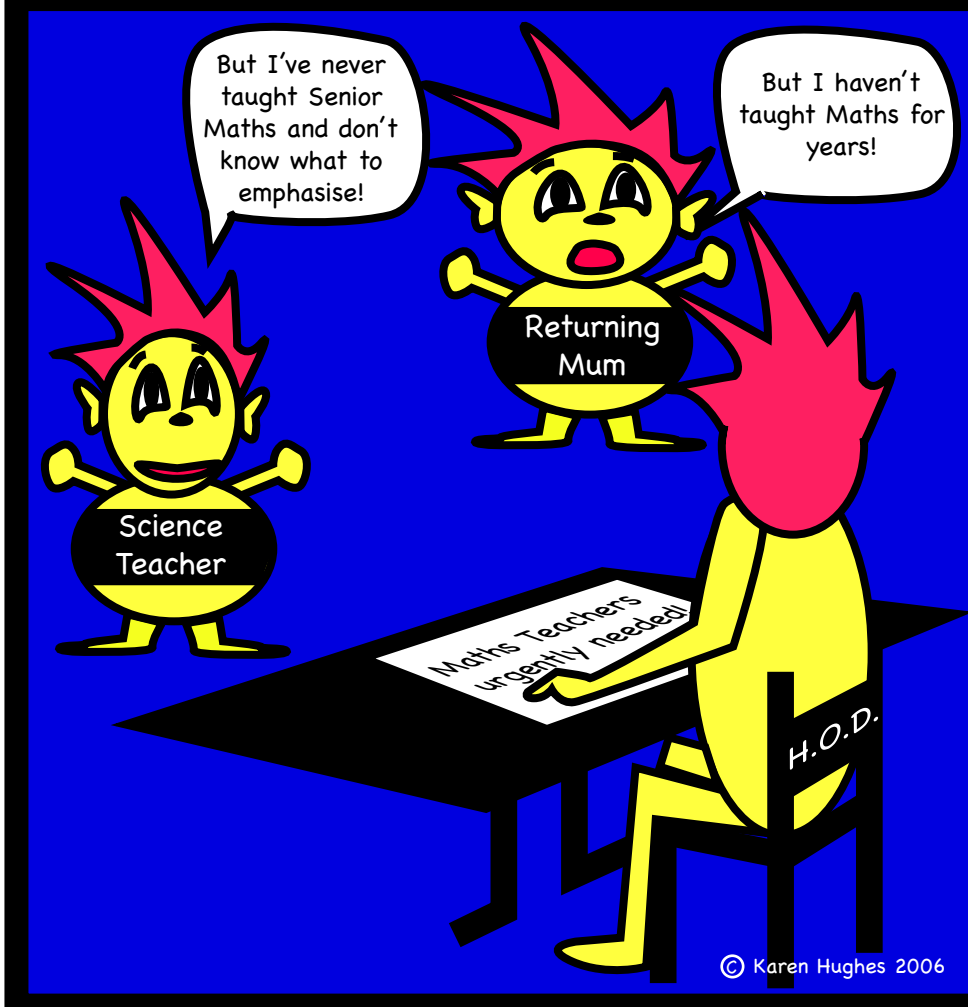

I need instant lessons that a non-maths specialist can follow.

They need to provide for the full range of students.

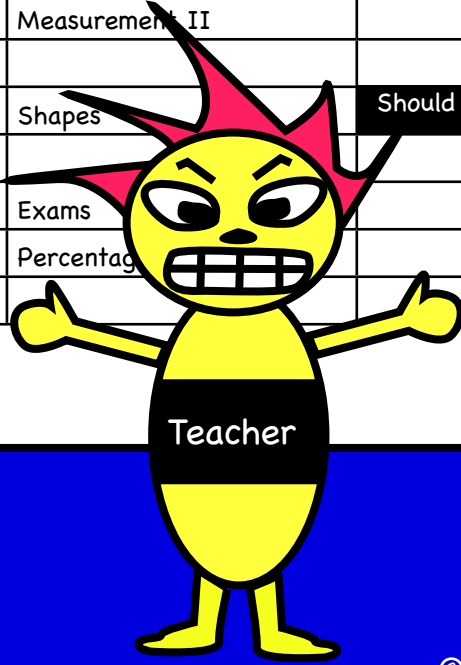

I need lessons that are resilient to interruptions - where students can still learn despite comings and goings within the same class.

I need consistent, structured lessons which prioritise important concepts, anticipate common misconceptions and emphasise those skills needed for the rest of senior school.

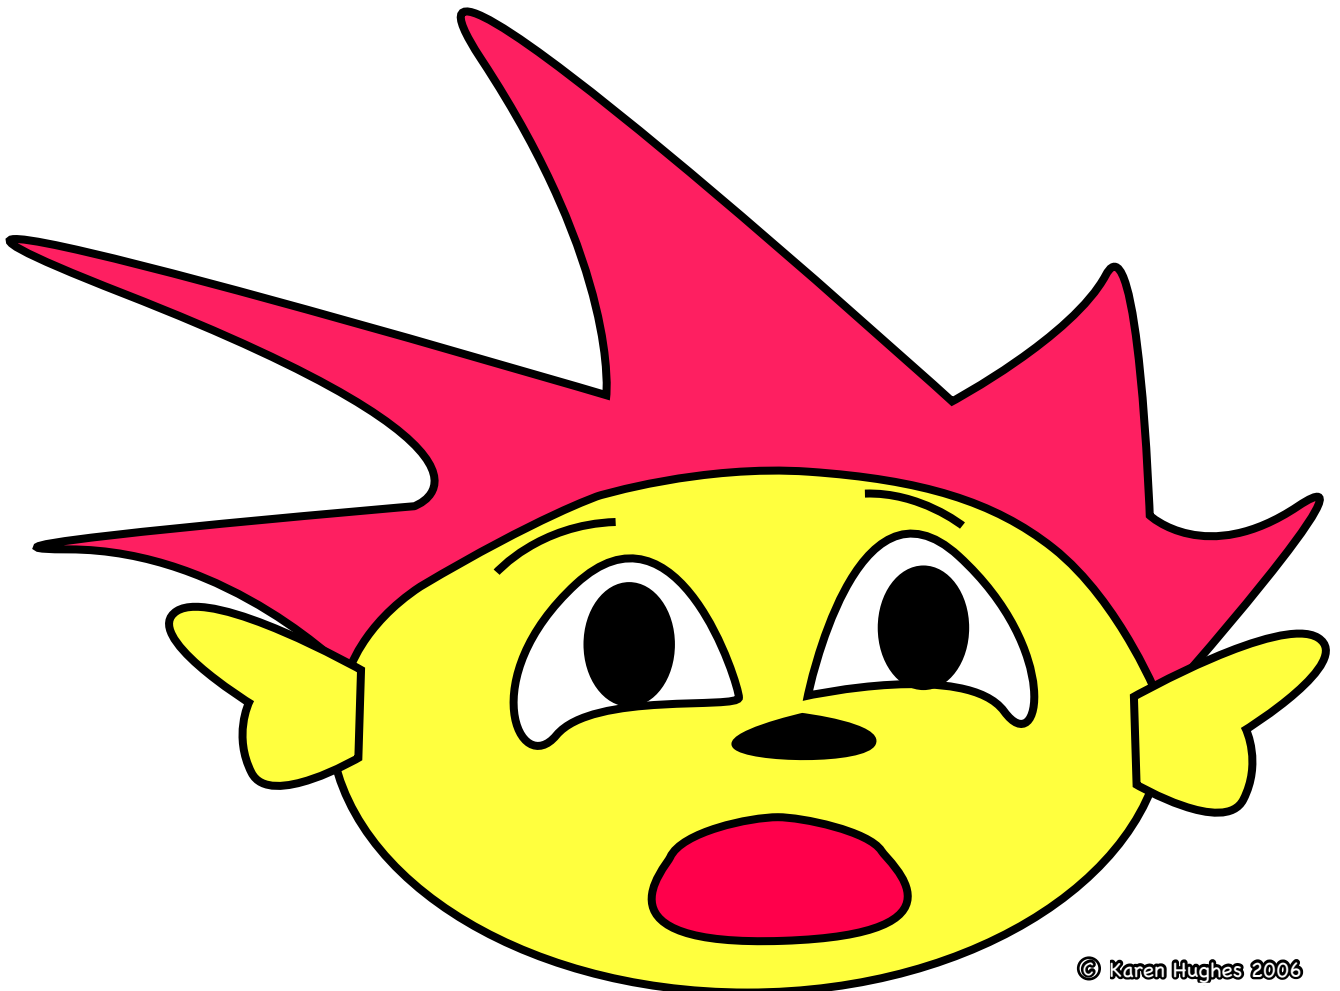

YEARLY TIMELINE

Week	Term 4 Topics	
1	Measurement 1	
2		Just completed
3	Measurement II	
4		
5	Shapes	Should be here!
6		
7	Exams	
8	Percentage	
9		

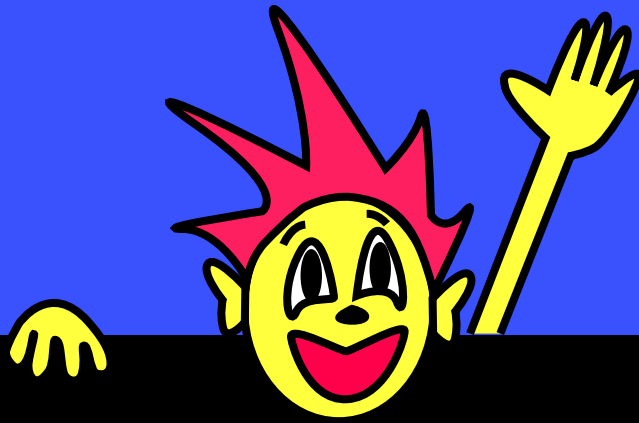

I need lessons which can be taught with efficiency to catch us up to schedule.
